1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 22,27 and 56-58 are rejected under 35 U.S.C. 102(b) as being anticipated by Dotta (4,485,713), who discloses;

A first ram (2) and a second ram (1),
4 rotating members (center parts of 9,109),
Off-center stub shafts (7,8,107,108),
4 drive members (gear teeth on 9,109),
1st and 2nd cutting tools (3, 4) comprising of a blade and "ram set",
A motor (intrinsically attached to 11),
1st and 2nd linear guides (5,105) fixed to the first ram (2).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17, 22,27 and 56-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yahara (4,027,564) and Dotta (4,485,713).

Yahara discloses,

A first ram (11) and a second ram (11'),

4 rotating members (16,16'),

Off-center stub shafts (15,15');

4 drive members (e.g. 20,20',23,24),

1st and 2nd cutting tools (26,26') comprising a blade and "ram set".

Linear guides (12).

In regards to claim 22, the first and third rotating members are in a direct drive configuration as seen in the cover figure.

In regards to claims 27 and 56-58, attention is drawn to the cover figure.

Yahara's linear guides are not *fixed* to the first ram. However Dotta shows that this configuration is an art recognized equivalent known for the same purpose (5,105). It would have been obvious to one of ordinary skill in the art to have modified Yahara by having the linear guides be fixed to the first ram, as taught by Dotta, since it would work just as well either way.

Conversely, Dotta could be viewed as the base reference. If it was perceived that Dotta's cutting tools (3,4) were not a "blade and ram set", then it would have been obvious to one of ordinary skill in the art to have modified Dotta by swapping his punch and die set for the cutoff blade and ram set of Yahara, in order to be able to sever one sheet from another.

4. Applicant's arguments have been fully considered but they are not persuasive because Applicant did not specifically point out what the references were missing.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
